

WHITEHAWK

360 CYBER RISK FRAMEWORK

WHAT

INTEROS

BITSIGHT

WhiteHawk in partnership with Interos & BitSight

- Tailored approach to your supply chain risk needs
- Risk rating baseline and continuous updates
- Immediate & continuous mitigation of cyber risks
- Comprehensive Risk Dashboard across all 3rd & 4th parties

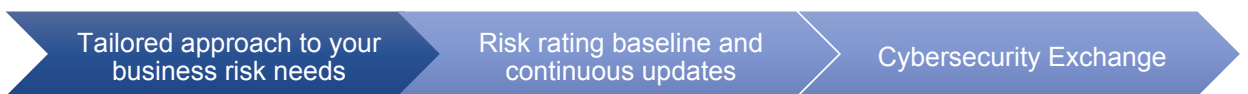

WHY

HOW

INTEROS

BITSIGHT

- Eco-system assurance and monitoring via a comprehensive and holistic look at risks enterprise wide that 3rd parties can unknowingly introduce
- These risks can be (1) identified via Eco-system mapping, (2) prioritized supplier assessments, and (3) continuously evaluated via monitoring.
- For more information visit <http://www.interos.net/>

- Higher the rating, the more effective the company is in implementing security best practices
- Ratings are calculated using a proprietary algorithm that analyzes and classifies externally observable data (250-900)
- Ratings are generated based on four classes of data — compromised systems, diligence user behavior, and data breaches.
- Learn more about how ratings are calculated at <https://goo.gl/CnnEiM>

- Online accessible and immediate mitigation of cyber risks for all Small and Midsize Businesses (SMB) (without productizing)
- Accessible and scalable online Cybersecurity Exchange
- Mapping to identified risk concerns
- Complimentary cyber risk profile via AI CyberPath Solution Engine
- Automatic mapping to solution options (Basic, Balanced, Advanced)
- Cyber Analysts to assist throughout the process
- For more information visit www.whitehawk.com

To get your 360 Cyber Risk Framework, email advisoryservices@whitehawk.com.

All feeds into a Living Risk Dashboard, providing daily insight to your tailored Company Risk Program and actionable information to be leveraged across the company, to the C-Suite, and to the BOD. Retain open reach back to WhiteHawk, BitSight, & Interos for changes, updated regulations, and to add new sub-contractors.
